Outcomes Optimization Software
for Data-Driven Practices

Validated Measures & National Comparisons
Practitioners get immediate tools for working on patient expectations and shared-decision making. Owners get data to improve the practice from multiple aspects and to assist with marketing to referral sources, payers and the consumer.

- Measures are collected electronically to integrate easily into your office workflow
- Practitioners get risk-adjusted projections for functional change and number of visits
- Owners get over 400 reports including practitioner performance, referral sources, and patient satisfaction

Validated Outcomes Measures Available
- CareConnections Functional Index
- Activity Measure for Post-Acute Care (AM-PAC™)
- Patient Specific Functional Scale
- Fear Avoidance and Belief Questionnaire

Preparing for Value-Based Care and a Patient-Centered Model

Don’t get left behind in the transition to fee-for-value reimbursement. With CareConnections, start tracking your outcomes now so you have the data on your side for payer negotiations and are prepared for Medicare compliance.

You also can use the data to inform employee evaluation and development, monitor number of visits as compared to national benchmarks, gather data related to lost patients, and market to referral sources and the public.

- Comparative outcomes for functional change, change in pain and number of visits
- Risk Adjusted Minimal Clinically Important Difference (MCID)
- Patient Satisfaction including Net Promotor Score (NPS)
- Onboarding and support
