Sanctband A trusted brand since 2008, Sanctband prioritize on quality and optimization of users' performance. The Sanctband signature's Colour - Peach, Orange, Lime Green, Blueberry, Plum and Gray - corresponding with progressive resistance chart.

First Ever Powder-Free Bands

The powder content of Sanctband products is significantly lower than other brands available on the market. Powder-free bands are more comfortable to use and less messy. Say goodbye to unsightly stains and smudges on your clothing and hands. All our products do not require re-powdering and still serve as good as new even after extended use.

Reduced Protein

Manufactured using **Sanctech technology**, the reduced protein feature in all of our products help lower the incidence of latex allergy.

Extra Durable

Product safety? Our Sanctband Resistive products have passed stringent durability testing. This is testimony to Sanctband's rigorous safety standards and exceptionally high quality, excellent elongation and elasticity without distortion or breakage.

Eco-Friendly

We care about the environment and have our own in-house Green Initiative Programme. Our key raw materials are sourced close to our production facility, our latex formulas are heated using clean energy and every single Sanctband product is produced in line with our responsible water management standards.
